

# Meet someone you've helped

---

Molly, a 7-year-old little girl from Louisville, began having seizures almost immediately after being born. The first year of Molly's life was spent in and out of Kosair Children's Hospital, where doctors tried to control her seizures and understand the resulting developmental delays.

Molly's mother, Elizabeth, recently shared their incredible journey and expressed what Kentucky Employees Charitable Campaign (KECC) partner, Kosair Charities, has meant to her family.

*"...(Through Kosair Charities) I have been blessed with the gifts of wonderful nurses, doctors, therapists, special education teachers and special needs parents. Along with our family and friends, Kosair Charities is truly a lifeline of support. Molly allows me to see the ability in her disabilities every day, and I thank God for that gift."*

Read Molly's story [here](#). Included in the story is also a short [video](#).

**Your KECC donation matters to children like Molly.  
Thank you for your generosity!**

Learn more about the Kentucky Employees Charitable Campaign [here](#).  
Make your donation by the end of December for the 2016 campaign.
